

RAZZO™

techniques

COLOR PULL

ADD VISUAL INTEREST BY PULLING COLORS ALONG THE SURFACE OF YOUR CASTING.

- 1** Pour layers of different colors of Razzo into your mold.
- 2** To create the Color Pull effect, use a thin tool or stick, such as a cotton swab – try experimenting with tools of different widths.
- 3** Submerge your tool into the casting, then pull the material along the surface of the mold, maintaining contact as you pull.
