TotalBoat Podium Finish -- Tech Data Sheet

SUPPORT PRODUCTS:

Products Commonly Used with Podium Finish:	TotalBoat TotalBuff, TotalBoat TotalShine, TotalBoat Boat Soap

APPLICATION:

SUBSTRATES:	For use on fiberglass, gelcoat, and paint. Test any painted surfaces in a small, inconspicuous spot before full application.
GENERAL APPLICATION:	
1	Wash surface to be polished thoroughly with TotalBoat Boat Soap to remove any surface contaminants.
2	If fiberglass is chalky or faded, compound with TotalBoat TotalBuff then use TotalShine to restore the surface color and shine before applying.
3	Apply TotalBoat Podium Finish with a clean cloth or lint-free rag using a circular motion. Allow to dry to a haze. This should only take a few minutes.
4	Wipe the surface in a circular motion with a clean cloth to wipe off extra material and polish to a shiny surface. No hard rubbing is necessary. Two applications are recommended for best results and protection.
5	If desired, a maintenance coat of TotalBoat Podium Finish every 2-3 months will help maintain superior protection, shine, and drag reduction. It is recommended that dry sailed or regularly hauled boats using Podium Finish below the water should reapply every 2-3 weeks for optimal performance.
Note:	Podium Finish is not designed as an antifouling coating, but it may reduce staining and growth at or below the waterline.

APPLICATION DATA:

			PHYSICAL DATA:	
Application Method:	Rag, terrycloth towel, microfiber cloth		**Color:**	White, becomes clear when polished onto surface
Substrates:	Fiberglass, metal, glass, painted surfaces (always test before performing full application)		**Components:**	One
Number of Coats:	At least 2 (for best results)		**Finish:**	Gloss
Pot Life:	N/A		**Storage:**	Cool, dry area
Coverage (sq ft/gal):	N/A		**Flash Point:**	N/A
Application Temp/RH:	50-100ºF, 0-90%		**Units:**	Pint (16 oz.)
			Solids (% by Volume):	N/A
			VOC (lb/gal):	N/A
